```
    if(scanf("%d",&v)!=1) return 0;
    int coins[]={1000,500,100,50,20,10,5,2,1};
    int n=sizeof(coins)/sizeof(coins[0]);
    int c=0;
    for(int i=0;i<n;i++){
        if(v>=coins[i]){
            c+=v/coins[i];
            v%=coins[i];
        }
    }
    printf("%d\n",c);
    return 0;
}
```
